toss

www.TossForward.com

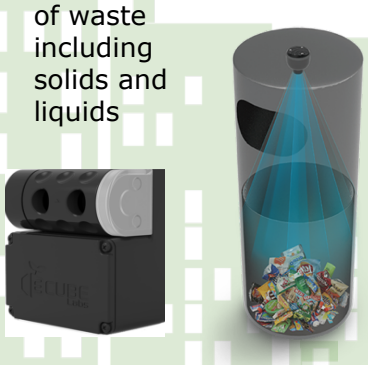
Toss provides smarter waste management and recycling solutions that reduce waste collection costs up to 80% while serving as a secure, self-powered location for wireless and sensor-based technologies like WiFi, beacons, small cell and 5G.

TossCUBE:

- Solar (or hybrid) options hold up to 8X more waste than standard containers
- Reduce collection frequency and costs up to 80%
- Wireless sensors deliver real-time bin status to Toss CleanCityNetworks platform

TossCAP:

- Wireless ultrasonic fill-level sensors easily attach to any bin
- Securely monitors container fill-levels and sends real-time data to Toss CleanCityNetworks
- Monitors any type of waste including solids and liquids



TossCCN:

- Toss CleanCityNetworks (CCN) is the leading waste management platform
- Provides real-time monitoring, data collection and uses predictive analytics to optimize routes, schedules and bin placement

BENEFITS OF TOSS IN AIRPORTS:

- **50%-80% reduction** in waste collection costs
- Units can host **wireless technologies** (WiFi, sensors, DAS, small cell, 5G)
- **Push-notifications** for gate changes, security alerts, parking information
- Digital beacons **analyze foot traffic** and integrate with marketing promotions
- **Improved aesthetics,** less disruptions with collections and overflows
- Options for LED ad panels, LCD displays and custom wraps = **ad revenue opportunity**
